

Voice of the Process (VOP) – Baseline Results

Key Baseline Measures

Measure	Baseline Result
Average checkout waiting time	8.5 minutes
Median checkout waiting time	8.0 minutes
Percent of customers waiting > 7 minutes	35%
Abandoned orders during rush (per 2-hour window)	About 3–5 observed per morning
Average queue length at 8:30 a.m.	12–15 people

Baseline Takeaways

- The process clearly does not meet the informal “under 7 minutes” expectation.
- Variation is high; some students are served quickly, while others wait much longer.
- There is enough pain (both customer and staff) to justify deeper analysis in the next phase.
