

Basic Statistics – Checkout Waiting Time

Data Set Summary

- Number of observations: 200 customers
- Time window: Weekdays, 8–10 a.m., across 2 weeks

Statistic	Value (minutes)
Minimum	3.0
25th percentile (Q1)	7.0
Median	8.0
75th percentile (Q3)	10.0
Maximum	15.0
Mean (average)	8.5
Standard deviation	2.3

Plain-Language Interpretation

- Most students wait between about 7 and 10 minutes to pay.
- Some unlucky students wait 12–15 minutes, which matches the complaints.
- The spread (standard deviation) is fairly large, so the experience is not very consistent.
